WATERDREAM CALIFORNIA 52'

distributed by Vanguard Yachts

The California 52': genius and timeless

There is nothing that breaks the beautiful line of this boat. With a magnificent minimal aesthetic design by Vripack in the Netherlands, Waterdreams' new entirely hand-built California 52' day boat is the right vessel for you.

Whether you're exploring an idyllic cove on the coast of England or simply bobbing on the sun-soaked Côte d'Azur, everything is thought-out and possible.

The most spacious and timeless 52' on the market

The super smart lay out offers you the most spacious 52' on the market and all facilities for outdoor living. Together with the sound engineers of Rockford Fosgate the ideal audio set up is realized. Moreover, in the centre of the beautiful window an innovative access is designed to easily enjoy the front sun deck.

WATERDREAM

The California can be customized to every owner's wishes

The interior has a beautiful fresh and light decor with smart and maintenance free materials. The cabin is as spacious with its two-meter-high ceiling with topside windows for a natural airflow and a dining area that can be converted into a closed sleeping room. The boat offers accommodation for a total of five people.

Unique steering console

With its World's first centered steering position and foldable tables the deck space is unprecedented. The captain' seat can be converted into a couch, so much more fun.

You truly feel special behind the wheel of this California 52'; a bespoke 90 cm wheel behind the unique W steering console. Handmade out of the best carbon, this literally a centerpiece. Finished with Garmin Navigation (GPS), toggle switches and compass to guide you to your destination. Completely made for single handed sailing.

EXPERIENCE WHAT FREEDOM FEELS LIKE ON THE WATER

The boat looks great, but wait until it will be launched in the water and blow your mind with excellent acceleration, high comfort and very easy handling. The Volvo Penta IPS drives enables joystick handling and speeds up to 40 knots.

BOAT SPECIFICATIONS

LOA: 14.65 m

Length at waterline: 14.27 m

Beam: 4.4 m

Design draught: 1.2 m

Waste water: 150 liters

Regulations

Classifications: CE-B

Waterdream carefully chooses all the materials used on the boat. Resulting in more than 80% recyclable materials.

Handmade out of pure aluminium

AGUATIC LIFE REIMAGINED

To finish it off the California has a large garage to fit a tender boat. The garage is fitted with electricity so all the inflatable tools or the Waterdream designed Seabob can be charged. The garage is specially designed so it can also fit a standup jet ski. In our opinion one of the best water toys ever invented.

They all had one thing. None had everything.
